AMERICAN ECONOMIC ASSOCIATION

PRINTED BY GEORGE BANTA PUBLISHING COMPANY

Publication Office: 450 Ahnaip Street, Menasha, Wisconsin

Executive Office: American Economic Association, Northwestern University,
Evanston, Illinois

Inquiries and other communications regarding membership, meetings, and the general affairs of the Association, as well as orders for publications, should be addressed to Dr. J. A. Washington Bell, Secretary of the American Economic Association, Northwestern University, Evanston, Illinois.

Entered at the post office at Menasha, Wisconsin, as second class matter. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, authorized September 13, 1928.

The *American Economic Review* is sent to all members of the American Economic Association as one of the privileges of membership, \$4.00 of the annual membership dues being payment of a year's subscription to the publication.

PRICE, \$3.00

FOREWORD

Conditions have now become sufficiently stabilized to warrant issuing a new and enlarged directory in the biographical form introduced just ten years ago, in 1938. The last directory of this kind was published in 1942, since when many changes have taken place. Some 2,200 new members have been added to our rolls and the Association has taken on many new activities.

In addition to the usual material found in our biennial handbook, the present directory contains special biographical material indicating "who is doing what and where," a classification of members according to their fields of specialization, and supplementary information and statistical summaries of interest to members of the Association and to economists generally. Features not heretofore contained in the directory are exhibits in the appendix listing names of economists in selected foreign countries; chairmen or heads of departments of economics, deans of schools of business, and directors of research institutes and business bureaus; a check list of domestic and foreign journals (with editors and staff) which are on the exchange list of the *American Economic Review*; and a description of economics as a professional field.

The information concerning the interest and activities was obtained from the answers to a questionnaire addressed to all members last May. A facsimile of the questionnaire appears below. (See back cover.) Of the total of 5,700 members, 3,232 filled out and returned the questionnaire by June 15, 1948, which was the deadline date. Time and expense did not permit follow-up requests. The response was not as good as in 1942 when two out of three members responded, nor 1938 when three out of four sent in returns. However, the results are considered fairly representative, since most of the formally-trained economists or practitioners are included in the descriptive material. A number of our newer members and nonprofessional economists apparently feel that they have nothing significant to contribute; hence did not answer our inquiry.

Some significant changes are noted in the classification of fields of specialization. A Committee on Classification studied our previous classification with great care, and, benefiting from the improvements made by the check list of the National Roster of Scientific and Specialized Personnel and a suggestive and very logical classification proposed by the Committee on the Review of Economics, the committee tested out numerous drafts and finally adopted the classification in its present form. A description of this classification, substantially as it stands, may be found in the *Papers and Proceedings* of the Association, May, 1948, pages 570-572.

With respect to the other items on the questionnaire, comment should be made on question number 7 pertaining to public service record. The Association's Committee on Research, believing that representative publications and research projects under way (items 5 and 6 on the questionnaire) would produce information which might be of such value that it should be called to the attention of the profession, requested that this item be included for their special study. The results of this study may be published as a part of the Research Committee's report, but they are not included here. Also, in the case of item

number 8—membership in other associations—the information is for our officers' use and does not appear as part of the biographical sketch. Cross-references to other "who's who" volumes or professional directories are indicated by abbreviations and are a convenient lead to more complete biographical sketches of a large number of members.

The geographical distribution of members and subscribers (with addresses in the case of the latter group) is listed by country, state, and city. A regional analysis of members and subscribers in the United States and data showing growth of the Association are found in the appendix. Also of interest to our members is the information concerning organizations with which our Association or its members are affiliated.

A final item in the appendix which the editor has been able to include without further enlarging the volume is a brief description of the profession of economist. This description originally composed at the request of the National Roster and thereafter somewhat simplified and popularized by the Roster staff was reviewed by a committee of the Association. After having exhausted a supply of some 150 copies and facing the prospects of paying ten cents a copy for an additional supply, it was decided to reproduce this description for general circulation.

It will probably be several years before another directory will be issued in this form, but it is hoped that by publishing annual supplements to the present directory in the *Proceedings* to cover new members, we may keep up with the growth of the Association.

This new and enlarged edition of the directory has taxed our facilities in the secretarial office to the utmost. On behalf of the Association, I wish to express appreciation to Miss Gertrude Tait, Mrs. Virginia Conklin, and Mr. Howard Neuberg, members of the secretarial staff, for their generous co-operation, without which this volume would not have been possible.

JAMES WASHINGTON BELL, *Secretary*

NOTE ON THE ASSOCIATION'S PUBLICATIONS

1. *The American Economic Review*—a quarterly publication containing main articles, book reviews, bibliographical and personal notes, records of special investigations by individuals and public commissions. Occasional supplements are published on special subjects; e.g., papers relating to the TNEC reports, 1942, and Implemental Aspects of Public Finance, 1944. Attention may be called to the series of photographs of past presidents being run in the *Review*. A limited number of reprints in a form suitable for framing will eventually be available for sale to our members.

2. *The Papers and Proceedings* of the annual meetings of the Association (edited by the Secretary), issued separately in May or as a supplement to the March number of the *Review*—main papers, round table summaries, together with reports of the Secretary, the Treasurer, the Editor, Finance Committee, Auditor, standing and special committees, minutes of the Executive Committee and of the business meetings. The appendix contains a cumulative list of the contents of the *Proceedings* from 1911 and the publications of the Association since 1886.

3. *The Handbook or Directory*—a biennial publication, usually in the form of a directory containing names and addresses of members, together with the year from which dates their continuous membership. The first specialized "who's who" directory was issued in 1938, the second in 1942, and the current one in 1948. The 1905 handbook contained brief biographical sketches of members.

4. *The Information Booklet*—describing the purposes, organization and activities of the Association, designed to answer inquiries from prospective members. Sent free upon request.

5. *The Blakiston Series of Republished Articles on Economics*—published in co-operation with the American Economic Association under the direction of the General Committee on Republications. This committee determines the subjects and appoints special committees to select the articles for each volume. These *ad hoc* committees usually consult a considerable panel of economists in selecting and preparing the final list of articles. Three volumes have so far appeared; namely, *Social Control of Industry*, *Business Cycle Theories*, *Theory and Income Distribution*. A fourth volume on *International Economics* is under way and others are contemplated.

6. *A Survey of Contemporary Economics*—a volume of newly written essays reviews the progress of economics in thirteen selected fields during the past ten or fifteen years. This volume grew out of a program developed and financed by the American Economic Association and carried out under the supervision of the Committee on the Review of Economics, J. J. Spengler, Chairman. The volume was edited by H. S. Ellis and was published in August, 1948, by The Blakiston Company, which has agreed to distribute the volume to members in good standing at a special price of \$3.35, the list price being \$4.75.

PURPOSES OF THE AMERICAN ECONOMIC ASSOCIATION

The American Economic Association is an organization composed of persons interested in the study of political economy or the economic phases of political and social questions. As may be seen by examining the list of members printed in this supplement, not only are all the universities and the most prominent colleges in the country represented in the Association by their teachers of economics and related subjects, but a large number of members come from among businessmen, journalists, lawyers, men in public life, and others interested in economic principles, or, more often, in their applications to social life. The Association has, besides, a growing representation in foreign countries.

The annual meetings, held during the Christmas holidays, are arranged as forums for the discussion of scientific questions and problems of social and economic policy. They give opportunity for contact and general understanding among teachers, students and businessmen interested in such questions. The meetings aim to counteract any tendency to particularism which geographical separation and diverse interests might otherwise foster.

The publications of the Association were begun in March, 1886. The first series of eleven volumes was completed by a general index in 1897. The second series, comprising two volumes, was published in 1897-99, and in addition thereto the Association issued during 1896-99 four volumes of *Economic Studies*. In 1900 a third series of quarterly publications was begun with the Papers and Proceedings of the Twelfth Annual Meeting, and was continued through 1910. *The Economic Bulletin*, issued quarterly and devoted to bibliography and current notes, was also published by the Association during the three years, 1908, 1909, and 1910.

In 1911 the Association began publishing the *American Economic Review*, a quarterly journal devoted to articles on economic subjects, reviews, abstracts of articles in current journals, and a classified bibliography of economic publications. During the thirty-seven years of its existence, the *Review* has made a place for itself among the scientific journals of the country.

The American Economic Association is the organ of no party, sect, or institution. It has no creed. Persons of all shades of economic opinion are found among its members, and widely different views are given a hearing in its annual meetings and through its publications.

With the exception of the editor of the *American Economic Review* and the Secretary-Treasurer, the officers of the Association receive no remuneration for their services. Its entire receipts are expended for the editing, printing, and circulation of the publications and for the annual meetings.

CHARTER AND BYLAWS OF THE AMERICAN ECONOMIC ASSOCIATION

The charter of incorporation of the American Economic Association, incorporated in the District of Columbia, February 3, 1923, provides as follows:

I. The name or title by which the society shall be known is the American Economic Association.

II. The time for which it is organized is perpetual.

III. The particular business and object of the society are as follows:

1. The encouragement of economic research, especially the historical study of the actual conditions of industrial life;

2. The issue of publications on economic subjects;

3. The encouragement of perfect freedom of economic discussion. The Association as such will take no partisan attitude, nor will it commit its members to any position on practical economic questions.

IV. The number of its trustees for the first year of its existence shall be fourteen.

The following bylaws have been adopted for the government of the Association:

I. MEMBERSHIP

1. Any person interested in economic inquiry may, on the nomination of a member, be enrolled in this Association.

2. There shall be six classes of members other than honorary: members paying an annual fee of \$5.00; family members (two or more living at the same address, second membership without subscription to the publications of the Association) paying an annual fee of \$1.00; junior members (available to graduate students for three consecutive years only) paying an annual fee of \$3.00; subscribing members paying an annual fee of \$10.00; contributing members paying an annual fee of \$25.00 or more; and life members comprising those members who contribute \$200.00 or more in a single payment. Life members shall be exempt from annual fees. Members shall have each year the privilege of designating the class of membership they choose for that year.¹

3. Foreign economists of distinction, not exceeding twenty-five in number, may be elected honorary members of the Association.

4. Every member is entitled to receive, as they appear, all reports and publications of the Association.

II. TRUSTEES

The trustees of this Association shall not be less than fourteen or more than fifteen in number, and the Board of Trustees shall be known as the Executive Committee. The Board of Trustees shall be composed of the persons elected as the Executive Committee at the time and place and in the manner set forth in the following bylaw providing for the election of officers.

III. OFFICERS²

1. The Association shall have the following officers who shall be elective officers: a President, two Vice-Presidents, six elected members of the Executive Committee. The terms of office of the President and Vice-President shall each be one year. The terms of office of the six elected members of the Executive Committee shall each be three years, two of the

¹ As amended at the December 28, 1940, annual meeting.

² Amendments as adopted at the annual meeting, December 29, 1933, and by mail ballot announced at the Business Meeting, January 26, 1946.

six terms of the six elected members of the Executive Committee to expire each year. Each regular term of office shall coincide with a calendar year or a multiple thereof.

2. As early in each year as practicable, the President of the Association shall appoint a Nominating Committee, consisting of a past officer,³ as chairman, and not less than five other members of the Association. The names of the Committee shall be published in the March or June issue of the *American Economic Review* with an invitation to the general membership that suggestions of nominees for the various offices be sent to the chairman of the Committee. The Nominating Committee shall be instructed to present to the Secretary of the Association on or before September 1 of each year a nominee for the presidency and two or more nominations for each elective office to be filled, the nominees being members of the Association. The candidate for president shall be selected by an electoral college consisting of the members of the Nominating and the Executive Committees. Space shall be provided on the ballot for the individual voter's alternative choice.³

3. Elective officers shall be chosen through elections to be held during the last three¹ months of the term of office of his predecessor. Each member shall be given the opportunity to vote by mail. The results of the election shall be certified and announced by the Secretary at the annual business meeting.

4. The Association shall have the following officers who shall be appointed by the Executive Committee: a Secretary, a Treasurer, a Managing Editor, and a Counsel. The terms of office of each of these officers shall be three calendar years. The Managing Editor shall, with the advice and consent of the Executive Committee, appoint members to an Editorial Board to assist him. The President may, at his discretion and with the advice and consent of the Executive Committee, appoint a Program Committee.

5. The Executive Committee shall consist of the President, the Vice-Presidents, the Secretary, the Treasurer, the Managing Editor, the three ex-Presidents who have last held office, and six elected members, provided that the Secretary, the Treasurer, and the Managing Editor shall not be entitled to vote in the Committee's meetings.

IV. DUTIES OF OFFICERS

1. The President of the Association shall preside at all meetings of the Association and of the Executive Committee, and in consultation with the Program Committee, shall prepare the programs for the annual meetings. In case of his disability, his duties shall devolve upon the Vice-Presidents in the order of their election, upon the Secretary, and upon the Treasurer.

2. The Secretary shall keep the records of the Association and perform such other duties as the Executive Committee may assign to him.

3. The Treasurer shall receive and have the custody of the funds of the Association, subject to the rules of the Executive Committee.

4. The Executive Committee shall have the control and management of the funds of the corporation. It may fill vacancies in the list of officers, and may adopt any rules or regulations for the conduct of its business not inconsistent with this constitution or with rules adopted at the annual meeting. It shall act as a committee on time and place of meetings and perform such other duties as the Association shall delegate to it. A quorum shall consist of five members.

5. The Editorial Board shall have charge of the publications of the Association. The Managing Editor shall be ex officio member and chairman of the Editorial Board.

6. The office of the corporation for legal purposes shall be at the office of the Counsel in the District of Columbia, and legal process against the corporation may be served on said Counsel.

³ As amended at the December 29, 1938, and December 29, 1941, annual meetings.

V. ANNUAL MEETING

The annual meeting of this corporation shall be held at such time and place as may be determined by the Executive Committee. Notice of such time and place shall be given by publication in the regular journal of the corporation, now known as the *American Economic Review*, at least ten days prior to such meeting. The first annual meeting shall be held at Providence, Rhode Island, on the 27th of December, 1923, at nine o'clock A.M., unless otherwise ordered by the Executive Committee.

VI. AMENDMENTS

Amendments, after having been approved by a majority of the Executive Committee present at a meeting regularly called, may be adopted by a majority vote of the members present at any regular meeting of the Association or by a majority of votes cast in a mail ballot authorized by the Executive Committee.⁴

⁴ As amended at the December 30, 1941, annual meeting.

FACSIMILE OF QUESTIONNAIRE SENT TO MEMBERS

American Economic Association "Who's Who" Directory, 1948

Fill out and return by June 15 to Dr. James Washington Bell, Northwestern University, Evanston, Illinois. NO FOLLOW-UP WILL BE SENT.

The American Economic Association will publish this year a special-purpose biographical directory of its members under the title, *The 1948 Directory of the American Economic Association*. Since another directory of this form will probably not be published in the next four to six years, we urge you to fill out and return this questionnaire before the deadline, so that this volume may be as complete as possible. Immediate response will enable us to start processing returns at once. Neither time nor additional expense will permit follow-up requests.

1. Institution or Firm Rank or Position (Prof., Pres., etc.) Nature of Activity (Rank in order of importance or time spent — 1, 2, 3, etc.)					
☐ Teaching ☐ Research ☐ Editorial ☐ Dept. Head ☐ Dean ☐ Business ☐ Govt. Service					
2. Place and Year of Birth					
3. Education and Academic or Professional Degrees					
Colleges and Universities		Years Attended (Give only when no degree awarded)		Degrees (If honorary, please indicate)	
				Year Granted	

4. Fields of Specialization or Major (Research) Interest. Indicate, in the order of interest, your three general fields (by inserting 1, 2, and 3 in the appropriate boxes below) and check subdivisions (a, b, etc.) representing your specialized fields, if any. Each member will be listed according to his first choice of general field in the tabulated classification. Second and third fields and specialized subdivisions will be indicated by numbers and letters following name.

(A description of the classification of the fields of economics may be found in the *Papers and Proceedings*, May, 1948, pages 570-572. Minor revisions have been made in this draft.)

5. **Representative Publications.** In addition to doctoral dissertation (first line below), list no more than three titles of your most significant publications, identifying them as follows: **D** for Ph.D. dissertation, **B** for book, **M** for monograph, and **A** for article.

D only Title _____
 (Whether published or not)
 Publisher or Journal _____ Date _____
 1. Title _____
 Publisher or Journal _____ Date _____
 2. Title _____
 Publisher or Journal _____ Date _____
 3. Title _____
 Publisher or Journal _____ Date _____

6. **Research Projects Under Way** _____

7. **Public Service Record**

	Branch or Agency	Rank or Title	Approximate Dates	Nature of Functions or Duties
a) Military	_____	_____	_____	_____
	_____	_____	_____	_____
	_____	_____	_____	_____
b) Civilian	_____	_____	_____	_____
	_____	_____	_____	_____
	_____	_____	_____	_____
c) Did your work give you an extensive knowledge of one or more commodity areas, functional aspects of business, labor markets, etc? If so, specify _____				
d) List significant economic reports (qualitative or otherwise) prepared in whole or in part by you. Give approximate date, title, and name of branch or section under which filed. (The Committee on Research desires this information in order to bring such work to the attention of the profession.)				
e) Provide the same information as in (d) above for other significant unpublished documents which you think may escape the attention of the profession.				

8. **Other Associations.** Check membership in other professional associations or learned societies. Indicate offices held, if any, with dates.

☐ Amer. Accounting Asso.	☐ Amer. Marketing Asso.	☐ Indus. Rel. Research Asso.
☐ Amer. Asso. of Univ. Teach. of Ins.	☐ Amer. Political Science Asso.	☐ Inst. of Math. Statistics
☐ Amer. Business Law Asso.	☐ Amer. Sociological Soc.	☐ Royal Economic Soc.
☐ Amer. Farm Economic Asso.	☐ Amer. Statistical Asso.	☐ Rural Sociological Soc.
☐ Amer. Finance Asso.	☐ Econometric Soc.	☐ Soc. for Public Admin.
☐ Amer. Historical Asso.	☐ Economic History Asso.	☐ _____

9. **Other Directories.** Check "who's who" directories in which you are listed.

☐ Who's Who in America	☐ Leaders in Education	☐ _____
☐ Directory of American Scholars	☐ International Who's Who (Europe)	

ALPHABETICAL LIST OF MEMBERS

CLASSIFICATION OF MEMBERS ACCORDING TO FIELDS OF SPECIALIZATION

For the past two years the Committee on Classification (M. A. Copeland, F. W. Fetter, P. T. Homan, Fritz Machlup, J. J. Spengler, and J. W. Bell, Chairman) has been working on a revised classification of subject-matter fields of economics. Our purpose was to produce a pattern which will serve for classifying both personnel (e.g., the *Directory*) and publications (e.g., book reviews, articles, and Ph.D. dissertation lists in the *Review*). We believe that the present revision is a fairly satisfactory compromise of precedent and logical arrangement and that we have achieved the dual purpose by resorting to the division of main groupings (genus) into subgroups (species)—the former usually being adequate for listing personnel and the latter being adapted for use in listing publications.

Our first effort in classifying members according to fields of specialization was made in the "Who's Who" volume of 1938. In the circular addressed to our members on that occasion we merely asked them to write, in the blank space provided for that purpose, their fields of interest or specialization expressed in their own terms. We did not then find it feasible to publish supplementary lists of members; we simply indicated fields along with the biographical data.

In the 1942 *Directory* we classified members according to the twenty fields which have since become familiar (see 1942 *Directory*, pages 127-139). The subject-matter groupings followed a conventional pattern used by the former editor of the *Review*, Davis Rich Dewey, reorganized and modified by the titles commonly employed by members answering our 1938 questionnaire. (Subheads of the main groupings are indicated in the editorial note to the 1942 *Directory* classification; see pages 128-131.)

A more elaborate effort worked out with our help was adopted by the National Roster of Scientific and Specialized Personnel in their check list of June, 1944, which simplified the classification problem by introducing what we had previously been unsuccessful in accomplishing; namely, by subdividing the more general areas (in other words, using the "genus-species" type of classification). Other classifications, such as the one designed for the volume on *A Survey of Contemporary Economics* by the Spengler Committee on the Review of Economics, were suggestive, but radical departures from accepted nomenclature were not made except in cases where logical reasons were very convincing.

A description of our classification of the fields of economics substantially as it is here presented may be found in the report of the Committee on Classification in the *Papers and Proceedings* of the Association, May, 1948, pages 570-572. The listing of the fields in the questionnaire and as used in this volume appears below. Members were instructed on the questionnaire to indicate, in the order of choice, three general fields and to check subdivisions representing their specialized fields, if any. In the groups which follow, each member answering the questionnaire is listed in the tabulated classification according to his first choice of general field; second and third fields and specialized subdivisions are indicated by numbers and letters following the name. Second and third choice listings were contemplated but the plan was given up on account of the limitations of space. For those who are interested, further processing can be easily accomplished. For instance, not all authorities in Money and Banking will be found in Group 7; they may appear under their first choice in Group 9 or 6, etc.

For ease in checking fields by designated numbers as indicated in the list of members or elsewhere, the complete classification of subject-matter groups or fields of specialization is repeated on the outside back cover of this volume.

CLASSIFICATION OF SUBJECT-MATTER GROUPS OR
FIELDS OF SPECIALIZATION

1. ECONOMIC THEORY; GENERAL ECONOMICS
 - a) Theory
 - b) History of Theory
 - c) Mathematical Economics
2. ECONOMIC HISTORY; NATIONAL ECONOMIES
 - a) Economic History
 - b) National Economies
3. STATISTICS AND ECONOMETRICS
 - a) Statistical Methods
 - b) Econometrics
 - c) Economic Measurements
4. ECONOMIC SYSTEMS; PLANNING AND REFORM; CO-OPERATION
 - a) Economic Systems and Policies
 - b) Planning and Reform
 - c) Co-operation
5. NATIONAL INCOME AND SOCIAL ACCOUNTING
6. BUSINESS FLUCTUATIONS
7. MONEY AND BANKING; SHORT-TERM CREDIT; CONSUMER FINANCE
8. BUSINESS FINANCE; INVESTMENTS AND SECURITY MARKETS; INSURANCE
 - a) Business Finance
 - b) Investments and Security Markets
 - c) Insurance
9. PUBLIC FINANCE
10. INTERNATIONAL ECONOMICS
11. BUSINESS ADMINISTRATION
 - a) Business Organization, Administration, Methods, and Management
 - b) Marketing and Advertising
 - c) Accounting
12. INDUSTRIAL ORGANIZATION AND MARKETS; PUBLIC REGULATION OF BUSINESS
 - a) Industrial Organization and Market Controls; Policies Concerning Competition and Monopoly
 - b) Public Regulation and Control of Business; Public Administration; Operation in War and Peace
13. PUBLIC UTILITIES; TRANSPORTATION; COMMUNICATIONS
 - a) Public Utilities
 - b) Transportation
 - c) Communications
14. INDUSTRY STUDIES
 - a) Manufacturing
 - b) Construction
 - c) Service Industries
15. LAND ECONOMICS; AGRICULTURAL ECONOMICS; ECONOMIC GEOGRAPHY
 - a) Land Economics; Conservation of Natural Resources
 - b) Agricultural Economics; Forestry and Fisheries
 - c) Mining and Minerals
 - d) Economic Geography; Regional Planning
 - e) Urban Land; Housing
16. LABOR
17. POPULATION; SOCIAL WELFARE AND LIVING STANDARDS
 - a) Population; Migration and Vital Statistics
 - b) Relief, Public Welfare, Pensions, Social Security (including all public programs)
 - c) Industrial Benefit Programs
 - d) Consumption Economics

ORGANIZATIONS WITH WHICH THE AMERICAN ECONOMIC ASSOCIATION IS AFFILIATED

AMERICAN COUNCIL OF LEARNED SOCIETIES
1219 16th Street, N.W., Washington 6, D.C.

Executive Director, Cornelius Krusé; *Administrative Secretary*, Mortimer Graves; *Secretary for Grants-in-Aid*, Donald Goodchild; *Special Adviser*, D. H. Daugherty; *Office Manager*, Joe N. Bourne; *Bursar*, Rogers Johnson.

Delegates of the American Economic Association: Frank H. Knight, 1946, Joseph A. Schumpeter, 1948.

Constituent Societies: American Philosophical Society, American Academy of Arts and Sciences, American Antiquarian Society, American Oriental Society, American Numismatic Society, American Philological Association, Archæological Institute of America, Society of Biblical Literature and Exegesis, Modern Language Association of America, American Historical Association, American Economic Association, American Folklore Society, American Philosophical Association, American Anthropological Association, American Political Science Association, Bibliographical Society of America, Association of American Geographers, American Sociological Society, American Society of International Law, College Art Association of America, History of Science Society, Linguistic Society of America, Mediaeval Academy of America.

SOCIAL SCIENCE RESEARCH COUNCIL
230 Park Avenue, New York 17, N.Y.

Officers and Staff: Pendleton Herring, *President*; Paul Webbink, *Vice-President*; Elbridge Sibley, *Executive Associate*; Eleanor C. Isbell; Charles Wagley; Gerald Breese; John G. Turnbull; Harold E. Jones, *Pacific Coast Representative*; Carolyn E. Allen, *Controller*.

Board of Directors, 1948: A. T. Poffenberger, *Chairman*; Robert B. Hall, *Vice-Chairman*; Shepard B. Clough, *Secretary*; Willard L. Thorp, *Treasurer*; Ralph L. Beals, Wendell C. Bennett, James C. Bonbright, E. W. Burgess, Leonard S. Cottrell, Jr., Joseph S. Davis, J. Frederic Dewhurst, Frederick S. Dunn, Elmer Ellis, Shelby M. Harrison, Pendleton Herring, Carl I. Hovland, Harold A. Innis, Charles E. Merriam, Roy F. Nichols, Willard C. Olson, J. Robert Oppenheimer, Frederick Osborn, Robert R. Sears, Joseph J. Spengler, Blair Stewart, William Duncan Strong, Ralph W. Tyler, S. S. Wilks, Kimball Young.

NATIONAL BUREAU OF ECONOMIC RESEARCH, INC.
1819 Broadway, New York 23, N.Y.

Chairman: C. Reinold Noyes; *President*, H. W. Laidler; *Vice-President*, W. W. Riefler; *Treasurer*, G. B. Roberts; *Executive Director*, W. J. Carson; *Editor*, Martha Anderson.

Research Staff: Arthur F. Burns, *Director of Research*; G. H. Moore, *Associate Director of Research*; Moses Abramovitz, Harold Barger, M. A. Copeland, Daniel Creamer, Solomon Fabricant, Milton Friedman, Millard Hastay, W. B. Hickman, F. F. Hill, Thor Hultgren, Simon Kuznets, Clarence D. Long, Ruth P. Mack, F. C. Mills, Wesley C. Mitchell, R. J. Saulnier, G. J. Stigler, Leo Wolman.

Directors at Large: Arthur F. Burns, W. L. Crum, O. W. Knauth, Simon Kuznets, H. W. Laidler, Shepard Morgan, C. Reinold Noyes, G. B. Roberts, Beardsley Rummler, Harry Scherman, George Soule, N. I. Stone, J. Raymond Walsh, Leo Wolman.

Directors by University Appointment: E. Wight Bakke, Yale; C. Canby Balderston, Pennsylvania; C. D. Edwards, Northwestern; G. A. Elliott, Toronto; H. M. Groves, Wisconsin; Gottfried Haberler, Harvard; Clarence Heer, North Carolina; R. L. Kozelka, Minnesota; Wesley C. Mitchell, Columbia; P. M. O'Leary, Cornell; W. W. Riefler, Institute for Advanced Study; T. O. Yntema, Chicago.

Directors Appointed by Other Organizations: P. F. Brundage, American Institute of Accountants; A. H. Cole, Economic History Association; F. C. Mills, American Statistical Association; Boris Shishkin, American Federation of Labor; W. C. Waite, American Farm Economic Association; D. H. Wallace, American Economic Association.

REGIONAL AND ALLIED ASSOCIATIONS

MIDWEST ECONOMIC ASSOCIATION

Officers, 1948-1949

President, C. Ward Macy, Coe College. *Vice-Presidents*, William H. Schrampf, Iowa State College; Sever Klaragard, St. Olaf College. *Secretary-Treasurer*, C. Woody Thompson, University of Iowa.

The Midwest Economic Association was founded in 1934, and has held annual meetings in April each year since. The programs begin Thursday evening and extend through Saturday forenoon. The area embraces Indiana, Illinois, Missouri, Kansas, Iowa, Nebraska, North Dakota, South Dakota, Minnesota, and Wisconsin. Scattered representation also comes from the states of Michigan and Ohio. The organization is informal. Any person engaged in full-time teaching or research, or graduate study, or graduate study and research or teaching in the field of economics or commerce is eligible for membership. A registration fee of \$1.00 is paid by those in attendance in lieu of a membership fee. The Association sponsors no publication. The annual program is prepared and the place of meeting is chosen by the Executive Committee consisting of the President, two Vice-Presidents, Secretary-Treasurer, and the immediate past president.

Past Presidents

1934	S. L. Miller, State University of Iowa	1941	H. G. Brown, University of Missouri
1935	M. H. Hunter, University of Illinois		
1936	Dale Yoder, University of Minnesota	1942-46	Jesse S. Robinson, Carlton College
1937	J. A. Estey, Purdue University	1947	C. L. Christensen, Indiana University
1938	John Ise, University of Kansas		
1939	W. B. Taylor, University of Wisconsin	1948	Roy Blough, University of Chicago
1940	J. E. Kirshman, University of Nebraska (deceased)		

The 1949 meeting will be held in St. Louis, April 21-23, 1949, Hotel Sheraton, headquarters.

SOUTHERN ECONOMIC ASSOCIATION

Officers, 1948

President, G. T. Schwenning, University of North Carolina. *Vice-Presidents*, G. H. Aull, Clemson College, D. M. Wright, University of Virginia. *Secretary-Treasurer*, J. B. McFerrin, University of Florida.

The Southern Economic Association was organized in 1927. The purpose of the Association is the stimulation of economic thought and research in connection with the economic problems of the South.

Membership dues are: annual \$3.00, sustaining \$5.00, contributing \$10.00, life \$60.00, institutional \$10.00. Membership fees include \$2.00 in payment for a year's subscription to the *Southern Economic Journal* at the special rate granted to members of the Southern Economic Association. The *Journal* is a quarterly published jointly by the Association and the University of North Carolina.

Past Presidents

1928-30	Walter J. Matherly, University of Florida	1935-36	J. W. Martin, University of Kentucky
1930-31	Lee Bidgood, University of Alabama	1936-37	C. B. Hoover, Duke University
1931-32	Tipton R. Snively, University of Virginia	1937-38	T. C. Bigham, University of Florida

1933-34	R. P. Brooks, University of Georgia	1939-40	J. B. Woosley, University of North Carolina
1934-35	A. S. Keister, Woman's College N.C.	1940-41	Ralph C. Hon, Southwestern University

1941-42	Malcolm H. Bryan, Federal Reserve Bank of Atlanta	1944-45	T. W. Glocker, University of Tennessee
1942-43	Edgar Z. Palmer, University of Kentucky	1945-46	H. L. McCracken, Louisiana State University
1943-44	D. Clark Hyde, University of Virginia	1946-47	Joseph J. Spengler, Duke University

PACIFIC COAST ECONOMIC ASSOCIATION

Officers, 1948

President, R. B. Pettengill, University of Southern California. *Vice-President*, F. W. Clower, State College of Washington. *Secretary-Treasurer*, Perry Mason, University of California. *Editor*, J. A. Guthrie, State College of Washington.

The Pacific Coast Economic Association, under a somewhat different name, was established in 1922, largely through the efforts of Alfred C. Schmitt, Edwin C. Robbins, Stephen I. Miller and Eliot Jones. The first meeting was held in Portland, Oregon. Membership is of two kinds: (1) institutional members, originally confined to accredited universities and colleges west of the Rocky Mountains, but now changed to include any educational institution approved by the Executive Committee, west of the Rockies; (2) individual members, who may be any person interested in the theory, principles and problems of economics and business. In addition to the professional economists, many Pacific Coast businessmen are members.

One of the principles of the P.C.E.A. is to devote approximately one-third or more of each annual conference to problems of the Pacific Slope; another is to co-operate with the efforts of the Social Science Research Council.

The membership of the Association as of July 1, 1948 was 291. Institutional dues are \$10.00 and \$5.00, depending upon size of the institution; individual membership is \$2.00 yearly. The principal publication is the annual proceedings.

Past Presidents

1922	Alfred C. Schmitt, Oregon State college	1935	W. L. Wanlass, Utah State College
1923	Eliot Jones, Stanford University	1936	Kenneth Duncan, Pomona College
1924	Rockwell D. Hunt, University of Southern California	1937	John B. Canning, Stanford University
1925	Howard T. Lewis, University of Washington	1938	James K. Hall, University of Washington
1926	Edwin C. Robbins, University of Oregon	1939	Richard B. Heflebower, Washington State College
1927	Theodore H. Boggs, University of British Columbia	1940	Arthur G. Coons, Claremont Colleges

1934	Reid L. McClung, University of Southern California		

ECONOMIC HISTORY ASSOCIATION

Officers, 1948

President, Herbert Heaton, University of Minnesota. *Vice-Presidents*, G. Heberton Evans, Johns Hopkins University, Carter Goodrich, Columbia University. *Secretary*, Ralph H. Bowen, Columbia University. *Treasurer*, Herman E. Krooss, New York University. *Board of Trustees*, The Officers of the Association, The Editors of the *Journal*, Vincent W. Bladen, University of Toronto, Florence E. de Roover, Cedarcrest College, Arthur L. Dunham, University of Michigan, Harold F. Williamson, Northwestern University, Arthur G. Peterson (representing the Agricultural History Society). *Editors*,

Frederic C. Lane, Johns Hopkins University, Thomas C. Cochran, New York University.
Assistant Editor, Winifred Carroll Ferguson, New York City.

The Economic History Association was founded in December, 1940. It is open to all historians, statisticians, economists, and businessmen, who find profit from historical investigations. It publishes semiannually the *Journal of Economic History*. Annual meetings are held in September and semiannual meetings in conjunction with the American Historical Association and the American Economic Association.

Membership dues, which include subscriptions to the *Journal*, are: American and Canadian members \$3.00; foreign members \$3.25; sustaining members \$10.00; and student members \$2.00.

EXHIBIT I

LIST OF ECONOMISTS IN SELECTED FOREIGN COUNTRIES

Our pretensions in presenting the following list of economists are modest. We realize that it is neither complete nor accurate, but we hope that it represents a step forward. Our objective is to compile, for a limited number of foreign countries, a sample list of "economists" in the American sense of the term. We think of an economist in this country as a formally-trained scholar who has finished his training through the Ph.D. degree and who has earned a claim to professional standing by having obtained the rank of professor in an institution of higher learning or who has had equivalent training and experience in research or administration in business or in government service.

Our initial intention was to publish only the lists which we had already compiled in this office for one purpose or another, but widespread interest in the project has broadened its scope to its present proportions. We present the wider coverage even though the lists in their present form are of very unequal quality. Some are still in a rough and preliminary stage; others have been carefully screened and reviewed.

There is no reliable source for this information. It has not been possible to get lists from the secretary of foreign learned societies, or professional associations corresponding to our own American Economic Association. In fact, in no instance have we been supplied with a ready-made list. They have in every case been prepared for the occasion and usually only after a preliminary list has been furnished by this office. Responses have been forthcoming on occasion because, as one correspondent wrote, "your list is so bad that it reflects discredit upon the person who made it up."

Probably the most useful source of information of this kind is found in the volume called *The World of Learning*, published in London by Europa Publications, Ltd. The contents are drawn from their volume *International Who's Who* (formerly *Minerva*). For the specialists, however, this source is quite inadequate and inaccurate; so also are the "Who's Who" volumes published in other countries. Lacking other sources, we took names from "Who's Who" sources and sent them to key men in respective countries with a request that they screen the lists and select those who would qualify as "economists" (in our sense of the term) and delete names or add additional ones according to their judgment. We asked them to consult their colleagues and this was usually done. These corrected lists were then sent to other well-known economists both here and abroad and these persons were asked to review the lists in the light of their familiarity with our conception of professional standards and in the light of postwar changes which have occurred abroad. Standards are not clearly definable and it will not be surprising to learn that the results here presented lack uniformity. If conspicuous omissions are noted or if names appear which should not be in the list, the mistakes are due to the fact that we have not made our instructions clear and that we have not consulted all of the right people.

In addition to the difficulty involved in defining an economist, another consideration has been bothersome in the case of certain countries. We have attempted to eliminate political considerations. We may know that some economists have been or still are collaborators—in fact all economists behind the "Iron Curtain" must be—but if persons qualify on the basis of scholarship, they have not consciously been omitted because of their political beliefs or past records.

Serious doubts have been expressed by some correspondents as to the advisability of publishing lists so obviously incomplete. Foreigners are often extremely sensitive and may individually be greatly disturbed to see the American Economic Association, an organization which they hold in high respect, assume such a responsibility. I quote from a letter written by a member well acquainted with these foreign peculiarities:

The only way in which recriminations and bitterness directed against the United States can be avoided, it seems to me, would be to have such lists prepared by the universities or . . . official entities in the countries concerned. In that case, of course, there would frequently be political and other unobjective motivations which would interfere with the production of a really satisfactory compilation, but at any rate the Association, as well as the United States generally, would be out of it.

Despite the dangers referred to above, we believe that the Association is the most appropriate agency to undertake this function. In fact, unless we do so there is little likelihood that it will be done at all. The solution of this difficulty is not to forego publication but to print the lists and explain their limitations.

This then is our disclaimer. The present effort is admittedly fragmentary and hastily thrown together. It is frankly experimental and is submitted in the spirit of one enthusiast who asserted "there are some things worth doing even if they are done badly." In justification of presenting this information we maintain that the war has brought about many changes and communications have been disrupted over a period of almost a decade. The re-establishment of a liaison between the scientific specialists of the different countries cannot await miracles from UNESCO. We have asked the learned councils to undertake this task for us and the A.C.L.S. reply is that "the investigation of the status of various disciplines and personnel in foreign countries is a responsibility individually of the constituent societies rather than the Council."

An enumeration of the names of those who have co-operated in this project would itself constitute a highly select roster of leading economists. Individual credit is certainly due them for their painstaking and discriminating help—some fragments represent an enormous amount of correspondence, checking, and conferring with colleagues—but our acknowledgement and thanks must be made to them collectively. If the lists have value it is largely due to their judgment and co-operation.

I add a postscript to this editorial note to call the attention of economists to Dr. Victor S. Clark's *Who's Who in Economics*, a microfilm edition of an ambitious fifteen-year project which engaged Dr. Clark's efforts until his death. Although this work did not prove useful in the present project, economists might be interested in knowing that there are included some five-thousand biographical sketches of economists from almost every country and over the historical past down to contemporary times.

In preparing the list of economists for Germany especial difficulties were encountered. Lists received from separate sources here and abroad were difficult to reconcile.

The first list below includes names upon which there seems to be fairly general agreement. The second list contains names which were included on the original lists from two or more sources but which were checked off by some subsequent reviewer. The third list, compiled from university catalogues and other sources, contains names which have not been adequately reviewed and undoubtedly includes (a) many who would not rate the rank of professor in American universities, (b) others who are not fully employed as professors, and (c) those whose *Gebiet* is *Betriebswirtschaft* rather than *Volkswirtschaftslehre*. The distinction between business administration and economics is more clearly drawn in Germany than with us. Perhaps business economists should have been excluded or listed separately to avoid undue length. The list may also contain names of professors whose status or whereabouts remain doubtful. There is a great deal of moving around on the part of professors in Germany affecting both locus and status. With all these shortcomings the list is presented with the hope that qualified persons in a position to know will complete the information we lack so that we may drop names that do not belong and add the others to the main group.

GERMANY—First List

Albrecht, Prof. Gerhard, Marburg (Nat. Econ., Labor, Soc. Sec.)
 Beckerath, Prof. Dr. Erwin von, Bonn (Theory, Econ. Sys.)
 Dietze, Prof. Constantin v., Freiburg (Agric. Internat. Econ.)
 Egner, Prof. Dr. Erich, Göttingen (Theory)
 Eucken, Prof. Dr. Walter, Freiburg (Econ. Theory, Money and Banking, Pub. Control)
 Gerloff, Prof. Dr. Wilhelm, Frankfurt/M. (Pub. Fin.)
 Hoffmann, Prof. Dr. Walther, Münster (Ind. Studies)
 Kromphardt, Prof. Dr. Wilhelm, Tech. Hochschule Hannover (Theory, Money and Banking)
 Mackenroth, Prof. Dr. Erich, Kiel (Econ. Theory, Bus. Cycles)
 Meyer, Prof. Dr. Fritz, Bonn (Econ. Theory, Money and Banking, Int. Econ.)
 Müller-Armack, Prof. Dr. Alfred, Münster (Econ. Hist., Nat. Econ., Econ. Syst., Bus. Cycles)
 Peter, Prof. Dr. Hans, Tübingen (Stats. and Econometrics, Pub. Pol. and Control, Theory)
 Pfister, Prof. Dr. Bernhard, Hamburg (Econ. Syst., Labor, Soc. Welfare)
 Predöhl, Prof. Dr. Andreas, Kiel (Location Theory, Bus. Cycles)
 Preiser, Prof. Dr. Erich, Heidelberg (Theory, Bus. Cycles)
 Rittershausen, Prof. Dr. Heinrich, Frankfurt/Höchst (Econ. Syst., Money and Credit, Pub. Fin.)
 Sauermann, Dr. Heinz, Frankfurt (Money and Banking)
 Schmitt, Prof. Dr. Alfons, Münster (Theory, Pub. Util.)
 Schmolders, Prof. Dr. Gunter, Köln (Pub. Pol. and Control, Ind. Studies)
 Schneider, Prof. Dr. Erich, Kiel (Theory)
 Stucken, Prof. Dr. Rudolf, Erlangen (Bus. Cycles, Money and Banking Bkg., Pub. Fin.)
 Terhalle, Prof. Dr. Fritz, Munich (Pub. Fin., Money and Banking)
 Teschemacher, Prof. Dr. Hans, Tübingen (Pub. Fin.)
 Wagemann, Prof. Dr. Ernst, Göttingen (Bus. Cycles)
 Weber, Prof. Dr. Alfred, Heidelberg (Theory, Sociology)
 Welter, Prof. Dr. Erich, Frankfurt/M. (Money and Banking Bkg., Bus. Cycles)
 Wessel, Prof. Dr. Theodor, Köln (Theory, Int. Econ.)
 Wiese, Prof. Dr. Leopold von, Köln (Theory, Soc. Econ.)

Zwiedineck-Südenhorst, Prof. Dr. Otto von
 Munich (Theory, Econ. Hist., Nat. Econ., Labor)

GERMANY—Second List

Bauer, Prof. Dr. Clemens, Freiburg (Econ., Hist. Nat. Econ.)
 Bolza, Dr. Hans, Würzburg (Theory)
 Brinkmann, Prof. Karl, Tübingen (Econ. Theory)
 Cahn-Garnier, Dr. Fritz, Stuttgart (Fin.)
 Carell, Prof. Erich, Würzburg (Econ. Theory, Bus. Cycles, Int. Trade)
 Erhard, Prof. Dr. Ludwig, München (Econ. Sys. Bus. Fluct., Pub. Pol. and Control)
 Gleitze, Prof. Dr. Otto, Berlin (Stats.)
 Helander, Prof. Even, Nürnberg (Transp.)
 Hesse, Prof. Albert, Stuttgart (Agric. Econ. Theory)
 Jecht, Prof. Horst, Heidelberg (Fin.)
 Kruse, Dozent Dr. Alfred, München (Ind. Studies)
 Kuczynski, Prof. Jürgen, Berlin (Labor Econ.)
 Liefmann-Keil, Dozentin Dr. Elisabeth, Freiburg (Money and Banking, Labor, Soc. Welfare)
 Lütge, Prof. Dr. Friedrich, München (Econ. Hist. Nat. Econ., Soc. Welfare)
 Maier, Dozent Dr. Karl Friedrich, Freiburg (Money and Banking, Int. Econ., Bus. Cycles)
 Miksch, Dr. habil. Leonhard, Frankfurt/Höchst (Theory, Econ. Admin., Pub. Policies)
 Möller, Dozent Dr. Hans, Frankfurt/Höchst (Econ. Theory, Pub. and Bus. Admin.)
 Moeller, Prof. Hero, Erlangen (Econ. Theory)
 Most, Prof. Dr. Otto, Mainz (Stats., Pub. Util.)
 Müllenfels, Prof. Dr. Albert von, Hamburg (Econ. Pol., Planning Money and Banking, Pub. Fin.)
 Nahmer, Prof. Dr. R. Noll v.d. Mainz (Money and Banking Pub. Fin.)
 Napp-Zinn, Prof. Dr. A. F., Mainz (Trans. Pub. Util.)
 Niehaus, Prof. Dr. Heinrich, Bonn-Poppelsdorf (Agric. Econ., Econ. Geog.)
 Pirath, Prof. Carl, (Transportation)
 Schneider, Prof. Oswald, Berlin (Fin.)
 Seraphim, Prof. Hans Jürgen, Münster (Agric. and Bus. Econ.)
 Veit, Präsident Dr. O., Frankfurt/M. (Econ. Sys. Bus. Cycles, Money and Banking)
 Waffenschmidt, Prof. Dr. W. G., Mannheim (Theory, Stats. and Econometrics, Ind. Studies)

GERMANY—Third List

Friedensberg, Präsident Dr. Ferdinand, Berlin (Bus. Cycles Res.)
 Mellerowicz, Prof. Konrad, Berlin (Bus. Econ.)
 Rogowsky, Prof. Bruno, Berlin (Bus. Econ.)
 Brinkmann, Prof. Theodor, Bonn (Econ. of Agric.)

Beckmann, Prof. Fritz, Bonn (Econ. Policy)
 Kirsch, Prof. Michael, Erlangen (Bus. Econ.)
 Weippert, Prof. Georg, Erlangen (Econ., Pub. Fin.,
 Statis.)
 Aufermann, Prof. Ewald, Frankfurt (Econ. and
 Tax.)
 Auler, Prof. Wilhelm, Frankfurt (Bus. Econ.)
 Gutenberg, Prof. Erich, Frankfurt (Bus. Econ.)
 Heleauer, Prof. Josef, Frankfurt (Bus. Econ.)
 Schmidt, Prof. Fritz, Frankfurt (Bus. Econ. and
 Transp.)
 Skalweit, Prof. August, Frankfurt (Hist. of Econ.)
 Wehrle, Prof. Emil, Frankfurt (Nat. Econ. Soc.
 Sci.)
 Lohmann, Prof. Martin, Freiburg (Economics)
 Wilken, Prof. Folkert, Freiburg (Nat. Economy)
 Andrae, Prof. Wilhelm, Giessen (Econ. Theory,
 Pub. Fin.)
 Auler, Prof. Wilhelm, Giessen (Bus. Econ.)
 Reinhold, Prof. Gerhard, Giessen (Agric. and For-
 estry Econ.)
 Abel, Prof. Wilhelm, Goettingen (Cooperatives)
 Fleck, Prof. Anton, Greifswald (Econ.)
 Gehrig, Prof. Hans, Halle (Nat. Economy)
 Eisleid, Prof. Kurt, Hamburg (Econ.)
 Ritschl, Prof. Hans, Hamburg (Nat. Economy)
 Schiller, Prof. Karl, Hamburg (Econ. Geog.)
 Pfeiderer, Prof. Otto, Heidelberg (Money and
 Credit)
 Sitzler, Prof., Heidelberg (Social Policy)
 Sultan, Prof., Heidelberg (Financial Sci.)
 Baade, Prof. Fritz, Kiel (Agric. Econ.)
 Fick, Prof. Harald, Kiel (Pub. Fin.)
 Guelich, Prof. Wilhelm, Kiel (Lit. of Econ. and
 Soc. Sci.)
 Savelsberg, Prof. Gertrud, Kiel (Social Policy)
 Fricke, Prof. Rolf, Karlsruhe (Nat. Economy)
 Berkenkopf, Prof. Paul, Köln (Nat. Economy)
 Beste, Prof. Theodor, Köln (Bus. Econ.)
 Breuer, Prof. Jakob, Köln (Statistics)
 Eckart, Prof. Christian, Köln (Nat. Economy)
 Kuske, Prof. Bruno, Köln (Econ. Hist.)
 Lindemann, Prof. Hugo, Köln (Soc. Econ. and
 Admin.)
 Schmalenbach, Prof. Eugen, Köln (Bus. Econ.)
 Schnettler, Prof. Albert, Köln (Bus. Econ.)
 Seyffert, Prof. Rudolf, Köln (Bus. Econ.)
 Tiburzius, Prof. Joachim, Leipzig (Econ.)
 Muenstermann, Prof. Hans, Mainz (Bus. Econ.)
 Haas, Prof., Mannheim (Ind. Econ., Com.)
 Le Coutre, Prof., Mannheim (Heidelberg) (Bus.
 Econ., Acctg.)
 Lysinski, Prof., Mannheim (Heidelberg) (Occupational
 Theory, Personnel Prob.)
 Anderson, Prof. Oskar, Munich (Statis.)
 Boeckmann, Prof. Lisl, Munich (Bus. Econ.)
 Fischer, Prof. Guido, Munich (Bus. Econ.)
 Gredner, Prof. Wilhelm, Munich (Econ. Geog.)
 Lukas, Prof. Eduard, Munich (Nat. Econ., Money)
 Roessle, Prof. Karl-Friedric, Munich (Bus. Econ.)
 Linhardt, Prof. Hans, Münster (Bus. Econ.)
 Schnettler, Prof. Albert, Münster (Bus. Econ.)
 Bergler, Prof. Georg, Nürnberg (Bus. Econ.)
 Kirsch, Prof. W., (Erlangen?) (Commerce)
 Proeßler, Prof. Hans, Nürnberg (Econ. Hist. and
 Soc.)
 Schaefer, Prof. Erich, Nürnberg (Bus. and Ind.
 Econ.)
 Vershofen, Prof. Wilhelm, Nürnberg (Econ.
 Theory)
 Weddigen, Prof. Walter, Nürnberg (Nat. Econ.)
 Bollheim, Prof. Guenter, Rostock (Nat. Economy)
 Koch, Prof. Woldemar, Stuttgart (Pub. Fin.)
 Rieger, Prof. Wilhelm, Stuttgart (Tübingen?)
 (Bus. Econ.)
 Sivers, Prof. Erich von, Stuttgart (Econ. Hist.,
 Bus. Cycles)
 Tæuber, Prof. Walter, Würzburg (Econ. Hist.,
 Soc.)
 Willeke, Eduard, Stuttgart (Statis., Int. Trade)

Forrester, Prof. R. B., Univ. Col., Aberystwyth
 Parris, S., Univ. Col., Cardiff
 Thomas, Prof. Brinley, Univ. Col., Cardiff

YUGOSLAVIA

Bicanic, Prof., Univ. of Zagreb
 Kosir, Prof. M., Univ. of Ljubljana
 Macura, Mr. Milos, Statist. Inst. of Serbia, Belgrade
 Marinović, Prof., Univ. of Zagreb
 Markovic, Univ. of Belgrade
 Mirković, Prof. M., Univ. of Zagreb
 Vogelink, Dr. Dolfe, Dir. of Statist., Vice-pres. of Planning Com., Belgrade
 Vrančić, Prof. Univ. of Zagreb
 Vuco, Prof. N., Univ. of Belgrade
 Zujovic, Prof. Milan J., Belgrade

The following incomplete lists of Latin-American economists are presented with strong misgivings. Original plans included only European countries. Only after urgent requests did we assemble these last minute fragments. The list is submitted more in the form of a report of progress than as a final product.

ARGENTINA

Alizon Garcia, Jorge, Oficina de Investigaciones Economicas, Buenos Aires (Banking)
 Barral-Souto, Dr. Prof. José, Univ. de Buenos Aires
 Bravo, Guillermo, Banco Central de la Republica (Money and Banking)

EXHIBIT II

LIST OF CHAIRMEN OR HEADS OF DEPARTMENTS OF ECONOMICS, DEANS OF SCHOOLS OF BUSINESS, AND DIRECTORS OF BUSINESS RESEARCH BUREAUS AND INSTITUTIONS IN SELECTED COLLEGES AND UNIVERSITIES

The list which follows contains names of the chairmen or heads of departments of economics only, deans of schools of business, and directors of economic research, labor relations institutes, bureaus of business, etc. This is not a complete list of all such administrators in American colleges and universities but represents, rather, a selected list of the names of the members of the American Economic Association who filled out and returned the 1948 *Directory* questionnaire, plus additions from miscellaneous sources which were readily available at the time. Only the larger institutions having substantial departments, schools, or institutes are represented. The inclusion of one-man departments or small clusters would unduly enlarge the list and hence defeat its main purpose. The *Educational Directory on Higher Education* of the United States Office of Education was consulted in this connection. In addition to the nucleus of names which have been gradually accumulated in the Secretary's Office, we consulted directories of the American Association of Collegiate Schools of Business and organizations such as the Industrial Relations Research Association, as well as some college and university catalogues which we had at hand. We also got some information by direct correspondence. Time and facilities did not permit tracing all duplications (we failed to ask that the department be indicated); nor were we able to fill many gaps.

We sent no follow-up inquiries to members who failed to return questionnaires; hence do not have a complete record of our own members. Again, not all administrators falling within the categories described are members of the Association.
